YOUR WEBSITE SHOULD WORK AS
HARD AS YOU DO.

1

What a Coltura Site Audit Covers

Every free site audit checks **six critical areas** of your website. Most business owners never look at any of these — and it costs them customers every single day.

- 01 **First Impressions & Design** — Does your site look professional or dated? Does it match what customers expect from your trade?
- 02 **Mobile Experience** — 60%+ of your customers visit on a phone. We test on 5 real devices, not just a desktop browser.
- 03 **Speed & Performance** — Load time directly affects Google rankings and whether people stay or bounce. Most trade sites fail this.
- 04 **SEO Foundations** — Meta tags, headings, schema markup, local signals. The stuff Google actually uses to decide where you rank.
- 05 **Content & Messaging** — Does your copy sell or just fill space? Are your service pages convincing customers to call?
- 06 **Conversion Path** — Is your phone number easy to find? Does your contact form work? Are you losing leads to friction?

Sample Audit: A Typical Trade Website

Below is a **realistic example** of what your audit looks like. We've based this on patterns we see across hundreds of trade websites every year. Your actual audit will be specific to *your* business, *your* town, and *your* competitors.

Disclaimer: This is a sample audit. Your real audit covers YOUR actual website, YOUR competitors, and YOUR local area. Every finding is specific to you. No templates.

Site at a Glance

3.8s LOAD TIME	47/100 MOBILE SCORE	3 H1 Tags HEADING CHAOS	0 LOCAL SCHEMA
CHECK	FINDING	IMPACT	STATUS
Mobile Experience	Text too small on mobile, buttons overlap, horizontal scroll on iPhone SE	60% of visitors leave immediately	CRITICAL
Page Speed	Homepage loads in 3.8 seconds. Google target is under 2.5s	Lower Google rankings + higher bounce rate	POOR
SEO Setup	No local schema markup. Missing Google Business Profile link. Meta descriptions too short on 8 pages	Invisible to local searches for '[trade] near me'	POOR
Contact & CTA	Phone number buried in footer. Contact form has 11 fields. No click-to-call on mobile	Lost leads — people give up before calling	CRITICAL
Design	Template looks identical to 3 competitors. No project photos. Generic stock imagery	No differentiation. Visitors assume you're cheap.	WEAK
Content	Homepage text is 80% 'Welcome to our website'. No unique selling points. Service pages have 2 sentences each	Doesn't sell. Customers call competitors instead.	WEAK
Reviews & Trust	12 Google reviews not displayed on site. No testimonials page. No trust badges	Missing the #1 thing customers look for	POOR
Security	No SSL certificate. Browser shows 'Not Secure' warning	Kills trust instantly. Google penalises this.	CRITICAL

What These Problems Cost You

Here's the uncomfortable truth about a website with these issues:

- **Mobile bounce rate over 60%:** For every 10 people who click your site from Google, 6 leave without even reading it. For a plumber getting 200 website visits a month, that's 120 potential customers gone.
- **Missing local SEO:** When someone searches 'plumber Macclesfield', Google decides who shows up. If your site doesn't have local schema, optimised headings, and fast load times, you're invisible. Your competitors with £500 websites are getting the calls instead.
- **No phone number visible:** The average mobile user spends 3 seconds deciding whether to call. If they can't find your number, they hit back and call the next result. That's a £200-£500 job gone — because your number was in the footer.
- **'Not Secure' warning:** 84% of people leave a site immediately when they see this. It doesn't matter how good your work is. The browser already told them not to trust you.

Conservative estimate: A trade business with the problems above is losing £1,200–£3,000 per month in missed calls and bookings — purely because of their website. Not their work. Their website.

How We'd Fix It

Every audit comes with a **three-step action plan** prioritised by impact:

- 01 Immediate Fixes (Week 1):** SSL certificate, mobile optimisation, phone number visible on every page, click-to-call button. These are the leaks costing you money right now.
- 02 Quick Wins (Week 2):** Local SEO setup with schema markup, Google Business Profile linked, proper heading structure, optimised meta descriptions. These get Google to notice you.
- 03 Growth Build (Week 3+):** Custom website rebuild with project galleries, review integration, proper service pages, and conversion-optimised contact forms. This is where you pull ahead of competitors permanently.

Cost of fixing vs. cost of doing nothing: A Coltura website starts at £495. The problems above cost £1,200-£3,000/month in lost business. The maths isn't complicated.

What Happens After Your Audit

Your real audit follows the same structure — but it's specific to **your** business:

- **We review your actual website** — every page, every heading, every image. We find exactly what's working and what isn't.
- **We check your competitors** — the top 3 businesses ranking for your trade in your town. We identify what they're doing better and where the gaps are.
- **We deliver a branded PDF** — same format as this sample, with specific findings, screenshots, and a prioritised action plan. No jargon. No upsell. Just clarity.
- **You decide what to do** — no obligation. No pushy sales call. If you want us to fix it, we quote you a price. If you want to take the audit and go elsewhere, that's fine too. It's yours.

Limited time offer: The free site audit is normally £99. We're offering it free for a limited time to businesses in Cheshire and Greater Manchester. 3 slots available this month.

Ready for Your Real Audit?

It takes 15 minutes for us to review your site. You get a PDF like this — but about *your* business, *your* competitors, *your* area.
